## Krups il caffe duomo how to make espresso

There was an error processing your request. The Krups Caffe Duomo can make traditional coffee, or strong and hardy espresso Insert a paper filter into the swiveling coffee filter located on the right side of your Krups Caffe Duomo machine. Place the desired amount of coffee grounds into the filter, and press the coffee filter into position. The coffee filter is locked in and ready for use when it makes a clicking sound when pressed into position. Open the hinged water chamber lid and pour in the appropriate amount of water in proportion to the amount of coffee grounds. Position the lid of the glass coffee carafe so that the front hooks on the coffee side of the machine are inside the carafe and the rectangular part of the carafe lid. Positioning the carafe correctly in this manner allows the carafe lid to be pushed down so that it connects with the carafe handle. Turn the coffee "ON/OFF" switch of your Krups Caffe Duomo to "ON," at which point the indicator light will illuminate and the coffee brewing process will begin. Place the filter basket into the small espresso/cappuccino coffee filter located on the left side of your Krups Caffe Duomo machine. Fill the filter with ground espresso to the appropriate level and gently pack the grounds down with your hand. Align the arrow symbol on the filter holder thumb guard with the arrow symbol on the left side of the machine. Place the filter holder into the brewing head on the left side of the machine, and turn the filter holder to the right until it can't be turned anymore. At this point, the filter holder arrow symbol should be located to the furthest right position in the lock-range. Open the lid at the top of the machine, unscrew the boiler cap, and fill the boiler container with a level of cold water appropriate to the amount of espresso or cappuccino you intend to make. Fasten the boiler cap back on by turning it clockwise. Attach the carafe lid to the carafe so that the opening of the lid is pointing toward the carafe pouring spout. Turn the espresso "ON/OFF" switch to the "ON" position to begin brewing. Pour 4 to 6 ounces of milk into a small pitcher and place the steam nozzle tip into the pitcher, if you're making cappuccino. Rotate the steam release knob counterclockwise to activate the steam nozzle, and lower the pitcher as the froth rises to keep the nozzle tip just under the surface of the milk. Turn the steam release knob clockwise to shut off the steam nozzle, while the nozzle is still in the frothed milk.
